

INTRODUCTION:

React Native is a popular framework for building cross-platform mobile applications using JavaScript. With React Native, you can create native mobile apps for both iOS and Android platforms using a single codebase. A todo list app is a common example used to demonstrate the basics of React Native development. In a todo list app, users can add, delete, and mark tasks as completed. React Native provides a set of components and APIs that make it easy to create a user interface for a todo list.

FEATURES and DESCRIPTIONS:

CRUD functions:

- 1. ADD: Users can create new tasks and add them to the todo list.
- 2. DELETE: Users can remove tasks from the todo list.
- 3. EDIT: Users can modify the details of existing tasks.
- 4. DISPLAY: Users can view the tasks in the todo list.
-

These CRUD functions enable users to manage their tasks efficiently in the todo list app
